

SKILLPORT®

A simple, adaptable learning management solution

“We believe technologies such as SkillPort will result in greater utilization of learning resources that matter, while saving organizations the money and time typically wasted on ineffective information searches.”

MICHAEL BRENNAN
Program Manager
IDC Learning
Services Research

SkillSoft has observed that a fundamental issue facing the learning function today is the need to establish a role in solving today's strategic business issues. Learning needs to be aligned with business objectives and also be meaningful for a diverse array of employees, with varying interests and needs. SkillSoft is focused on providing connected learning solutions that can be customized to support learner needs and business objectives.

The SkillPort® learning management system allows companies to leverage varying learning assets on a global basis, across multiple learning modalities. SkillPort has been the platform of choice for over 1,400 global organizations. Our customers have found

SkillPort to be an easy-to-implement, reliable and cost-effective way to deploy learning content within their organizations.

Central to SkillPort's rich, on-demand learning environment is Search-and-Learn, which provides learners a fast, easy way to search a broad array of e-learning content. Search-and-Learn® produces robust search results that include direct access to online, virtual and instructor led courses, online books, live mentors, practice certification exams, custom built learning programs, and more. Learners can instantly select and access the learning experience that is most appropriate for their needs.

Features and Benefits

For Learners

Search-and-Learn®

Perform on demand, integrated searches across your full library of available resources and be directed to the learning assets that meet your needs. Search results can include a wide range of learning solutions from a certification program to a specific book page, and much more.

My Plan

Save your favorite courses for easy access, create and manage a personal plan with completion goals and schedule email reminders to keep you on track.

My Reports

Learners can easily view a personal progress report and print completion certificates with SkillPort's My Reports.

Additional Features

- Catalog
- My Favorites
- Personalization options
- Direct Books24x7 access
- Download and mobile support
- Assistive technology support
- Mentoring

For Administrators

Learning Programs

Blend multiple learning resources into a learning program; manage deployment of the program for specific populations and provide the ability to track program progress over time.

Content Management

Simple and flexible tools let you organize resources according to company initiatives, assign learning plans with goals and target dates, tailor learning programs for specific groups and more.

Additional Features

- Completion criteria
- Course evaluations
- Custom logos and branding
- Custom pages and shortcuts
- Bulk updates
- Company news
- Export to .csv
- Multiple admin levels

Reporting

A variety of configurable reports provide summary and detailed information to help you monitor learning activity.

User Management

Structure learners into specific groups or hierarchies based on your content assignment and reporting needs.

To accommodate the more complex needs of some organizations' learning programs, SkillSoft has developed modules that can be added to your SkillPort solution.

Instructor Led Training Module

SkillPort's Instructor Led Training (ILT) Module helps administrators track all information related to instructor-led training learning assets, including creating and assigning courses and sessions; managing information about learning facilities and contacts; and tracking courses with a high level of learner interest and storing learner results.

Using SkillPort's ILT Module, students will have the ability to access a list of available instructor-led training courses and descriptions, view available sessions and enroll in their preferred session. Within the catalog, learners have access to a full list of all available instructor-led training courses. Additionally, students

will see relevant instructor-led training courses returned through Search-and-Learn queries, in an instructor-led course category.

Advanced Reporting Module

SkillSoft's Advanced Reporting Module helps organizations analyze and interpret a broad array of e-learning data, thereby leading to a more comprehensive understanding of their overall e-learning program, its usage and return on their investment. Customers have the ability to interpret their e-learning data by filtering and extracting just the data they need, when they need it. This is beneficial to customers with large sets of data and limited resources to massage this data. Whether customers want to view statistics at a high level or drilldown to see details behind summary statistics, the Advanced Reporting Module's page oriented displays scale to very large result sets of data and makes the process very straightforward.
